

BIO-FLOW

Complete grease trap maintenance system

A powerful digestant containing special enzymes that immediately break down starch and complex carbohydrates to energize the bacterial replication of our five distinct bacterial strains. Unlike detergents that simply push grease into sewer lines, these bacterial strains work together to quickly and naturally degrade organic waste. This process not only eliminates greasy accumulations, but also helps eliminate obnoxious odors at the molecular level while a pleasant fragrance keeps traps and plumbing lines smelling fresh.

Grease Trap Maintenance System Is Effective Against

- Odors
- Urine and feces
- Starch and carbohydrates
- Organic spills
