

GOLD PAN BARS

CONDENSATION PAN TREATMENT SYSTEM

GOLD PAN BAR strips are for use in drain pans of many cooling units such as air conditioners, refrigeration and dehumidifiers. You may use GOLD PAN BAR strips in catch basins of any units where standing water could begin to grow microbial, mold, slime, algae, bacteria or viruses. Continuous use will prevent foul odors and drain line clogging caused by the build up of micro-organisms and other undesirables. GOLD PAN BAR strips have a unique water activated time released design that stays actively feeding for six months and does not shrink. It includes a biocide, corrosion inhibitor, surfactants and odor counteractants.

FOR USE BY:

Apartments
Building Maint
Colleges
Food Processing
Hospitals
Hotels/Motels
Industrial Plants
Kitchens Resorts
Manufacturers
Municipalities
Nursing Homes
Office Buildings
Processing Plants
Restaurants
Retail Stores
Schools

FOR USE ON:

Air Conditioner
Fan Coils
Refrigerators
Vending Machines
Humidifiers
Beverage
Dispensers

FEATURE-BENEFIT:

Safe and Easy to Use
Eliminates Buildup
Prevents Blockage
Prevents Corrosion
Eliminates Stale Odors
Economical
Lasts 6 Months
Disposable in Trash
Water Activated
Time Released

DIRECTIONS:

Install the proper size strip in the evaporator drain pan and place it between the evaporator coil and the drain pan drain opening. Place it in the stream of water flowing from the coil to the drain pan fitting. Replace the strip every six months. Wash hands after handling the strip. Dispose of old strip along with everyday trash.

TECHNICAL DATA:

Active Ingredients: N-Alkyl (60%C14, 30%C16, 5%C12, 5% C18)
Dimethyl benzyl ammonium chloride
40% Inert Ingredient 60%
