

MUNOX®

ORGANIC WASTE DEGRADER

MUNOX® is a 100% all natural, live bacteria product that starts to work immediately and continues to grow. MUNOX® is designed to safely and biologically eliminate stubborn industrial and commercial wastes and odors. It's the only bacterial product recognized by the EPA's Design for the Environment Program and has met the DfE's rigorous challenge for biological formulations. MUNOX® has a guaranteed bacteria cell count of 378 Billion CFU per gallon. The quality control lab in which MUNOX® is formulated exceeds standards of quality in an unregulated industry. Regular doses of Munox in a collection system rapidly digests fats, carbohydrates, proteins and petroleum hydrocarbons. By insuring high populations of MUNOX'S® highly oxidative aerobic bacteria strains, it forces them to use their special capabilities that are extremely effective in breaking down industrial waste low in oxygen that native bacteria are not equipped to degrade. MUNOX® creates free flowing drains and eliminate odors. It also reduces flies by eliminating their habitat -breeding grounds . As part of your maintenance solutions MUNOX® is inexpensive to implement.

FOR USE BY:

Apartment Buildings
Buildings Maint.
Commercial Kitchens
Grounds Maint.
Hospital
Parks and Rec.
Plumbing Contractor
Sanitation Dept.
Street Dept.
WWTP

FOR USE ON:

Lift Stations
DAF Tanks
Drains
Grease Traps
Separators
Septic Tanks
Skimmers
Aeration Basins
Lagoons
Ponds
Bio-Reactors

FEATURE-BENEFIT:

Natural Biological Digestion
Recognized by the EPA
100 % Natural
Works on Fats Oils Greases and Hydrocarbons Oils and Greases
Reduces Odors
Ready To Use
Easy To Use
Effective Immediately
Environmentally Friendly
1 Year Long Shelf Life

DIRECTIONS:

WWTP: Add 5 gallons daily, week 1. Add 0.5 gallons daily thereafter.

Lagoons: Add 2 gallons daily, week 1. Add 0.5 gallons daily thereafter.

Ponds: Add 5 gallons initially. Add 5 gallons per month thereafter.

Grease Trap: Add 2oz. to 10oz. Daily depending on gallon size and frequency of fill rate.

TECHNICAL DATA:

Type: Liquid
Specific Gravity: 1.0
Bacteria Count: 378 CFU per gallon
Appearance: Blue
Odor: Earthy Scent

Quantities: 2x 2.5 gal., 5 gal., 55 gal.,
