TOTAL SOLUTIONS®

WATER TREATMENT

OXY TREAT

Minimizes Oxygen Pitting

WORKS IN SYSTEMS WITH OR WITHOUT A DEAERATING HEATER

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: One Gallon (128 fl. oz.)

Manufactured By: Total Solutions®
PO Box 240014 • Milwaukee, WI 53224 • 1-800-743-6417

DESCRIPTION

This product is a catalyzed oxygen scavenger that quickly removes dissolved oxygen from boiler feedwater. It provides additional protection against pitting and corrosion of internal boiler surfaces when used in conjunction with scale and corrosion inhibitors.

DIRECTIONS

Dosages will depend upon the quantity of oxygen in the feedwater and the feedwater temperature. A small excess will be needed to maintain a control residual in the boiler. Control the level or by maintaining a sulfite level of between 20 - 40 ppm.

Should be fed on a continuous basis to either the condensate return tank or deaerating section. When feeding from a solution tank, the feed solution should be protected from the atmosphere by means of a floating cover in the tank. If desired and practical, this product can be mixed in a solution tank with other boiler treatment products and fed into the feedwater system or directly into the boiler.

DISPOSAL

Offer empty container for recycling. If recycling is not available, discard container in trash.

Please Recycle.

For industrial and commercial use only.
