

CAUTION

Keep out of the reach of children. Do not swallow. Spray away from user.

FIRST AID

Skin: Wash contaminated area with running water. Get medical attention if irritation develops.

Eyes: Check for and remove contact lens. Immediately flush with plenty of water for at least 15 minutes. If irritation develops, consult a physician.

Inhale: Remove to fresh air.

Ingest: If product is swallowed, do not induce vomiting. If vomiting occurs keep head lower than hips to help prevent aspiration. If individual is alert, give plenty of water to drink. Never give anything by mouth to an unconscious person.

- *New & Improved Formula*
- *Neutralizes Foul Odors Instantly*
- *Cleans Away Deeply Embedded Odors*
- *Leaves No Fragrance*
- *Non-Staining*

**CAUTION: KEEP OUT OF REACH OF CHILDREN
DO NOT SPRAY TOWARDS FACE**

See back panel for additional cautions

TKO is much more than a fragrance or masking agent. TKO is the best odor counteractant available. This special formula encapsulates and neutralizes sulfur and nitrogen based compounds associated with most foul odors. Unlike similar products, TKO will not cause re-soiling of fabrics, carpets, draperies, etc. These odors include cigarette smoke, pet odors, odors associated with urine and fecal matter, odors associated with mold and mildew, body odors, rancid food, kitchen odors such as fried food, onions, fish, etc.

AREAS OF APPLICATION FOR TKO

TKO can be used in:

Nursing homes, locker rooms, hotels, rest areas, transfer stations, vehicles, RVs, smoking areas, pet areas, public facilities, rest areas, bars, restaurants, rental properties, musty basements, locker rooms, and other areas containing malodors.

TKO can be used to treat:

Fabrics, carpets, draperies, mattresses, air filters, soured clothes, refrigerators, athletic equipment, and it may be used as a space spray.

DIRECTIONS FOR USE

Carpet and fabric: Use only on water-safe fabrics. Before using, test on a small area to make sure colors do not fade. If solid or liquid waste is present, remove and clean with the appropriate Purity product prior to treating with TKO. Hold sprayer 8-12 inches away, and spray lightly covering complete area. Repeat process, spraying at a 90 degree angle. Remove excess by blotting with a clean white cloth. Allow 5-10 minutes before allowing contact with surface.

Space spray: Most space odors originate from odor-causing substances present in the room. If these areas can be identified, these surfaces (porous surfaces such as carpets, fabrics, furniture, and draperies) should be treated as described above. Then, spray the room using a light mist. For heavy odors: 4-8 sprays/1000 cubic feet. For light odors: 2-4 sprays/1000 cubic feet. For best results: close area for 5 – 10 minutes to allow TKO to combat malodors. For heavy odors: allow up to 30 minutes.

Air filters: Spray lightly over entire area. Do not overspray.

Kitchens: Cover or put away all food, dishes, and utensils, then apply as a space spray

Refrigerators: Empty and clean thoroughly using appropriate Purity product, then apply as a space spray. Remove excess by wiping dry before reusing refrigerator.
